Midwest Undergraduate Mathematics Symposium

Friday and Saturday, April 12 and 13, 2013
Simpson College - Carver Science Center - Indianola, Iowa

CALL FOR PRESENTATIONS

The main goal of MUMS is to promote undergraduate study in the mathematical sciences. Undergraduate students are invited to present 10-15 minute talks or posters from any area of mathematics. Possible topics for presentations include, but are not limited to:

- results of class projects,
- solutions to contest problems (Putnam Exam, modeling competitions, etc.),
- results from undergraduate research projects (including results from REUs),
- expository talks on interesting topics in mathematics,
- papers on the history of mathematics,
- mathematics education projects, and
- independent work in mathematics, statistics, or computer science.

Faculty are also invited to present 10-15 minute talks on mathematical topics that are relevant to undergraduate students or talks about programs that support student work in the mathematical sciences.

EVENTS

In addition to the contributed student and faculty presentations, there will be plenary talks given by Dr. T.J. Hitchman (University of Northern Iowa) and Dr. Rick Gillman (Valparaiso University). There will also be a panel discussion on REUs and study abroad opportunities, as well as a panel discussion with representatives from graduate schools and various careers.

REGISTRATION

There is no registration fee and lunch is provided free of charge. Advanced registration is preferred by Friday, March 29, for planning purposes, but attendees may also register the morning of the conference. Travel stipends are available. For more information, visit simpson.edu/math/mathematics-events/midwest-undergraduate-mathematics-symposium/

FUNDING

Funding for MUMS 2013 is provided by NSF grant DMS-0846477 through the MAA Regional Undergraduate Mathematics Conferences program (maa.org/RUMC). Additional funding is provided by the Simpson College Mathematics Department (simpson.edu/math).
