

Linking to Websites

1. Turn editing on
2. Click Add an activity or resource
3. Select URL (it is located at the very bottom of the list) and click Add
4. Enter the name, description, and the URL. I recommend that you copy the link address from your browser and paste it in. Do not try to use the Choose a link... option.

General

Name* MERLOT II

Description* Show editing tools

Use this website to find open educational resources that you can use to enhance student learning in your courses.

Display description on course page ?

Content

External URL*

5. Click Save and return to course

Note that I have checked the “Display description on course page” box. This results in the description I have entered appearing on the main page (see example below). Displaying descriptions that tell students what to do with that particular resource can be very helpful.
